

**On average, our customers are seeing these levels of improvement in these key areas.**

# 1 Results Data– Usage and Adoption

*Ease of access combined with shorter video content and quizzes results in quicker adoption and participation.*

**TOTAL USERS/MODULES COMPLETED BY CANADIAN FLEETS COMPARATIVE**

Total Number of Users: **785**  
 Total Number of Modules Completed: **1153**  
**Time Period:** (90 Days)  
 April 12, 2024 – July 10, 2024

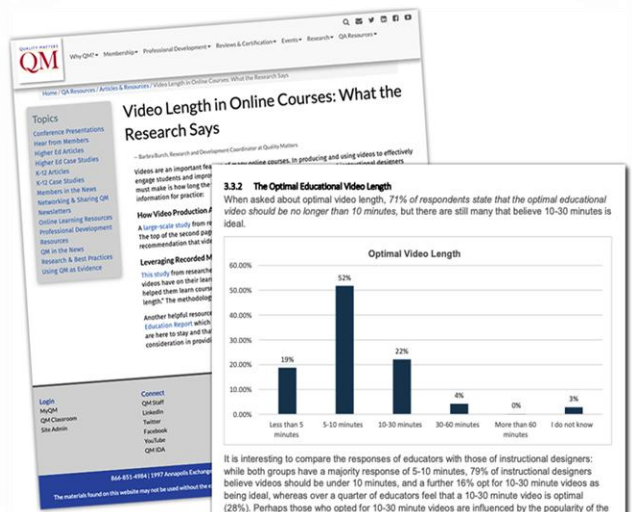

**Additional Notes:**

- Carrier B's 296 Modules amounted to 106 H, 40 M, 8 S training duration.
- Carrier D's 315 modules amounted to 37 H, 59 M, 16 S training duration.

# 2 Micro-Learning Content

*MIT Research: 6.9 Video Sessions viewed concluded the optimal video length was 6 minutes to maximize retention.*

# 3

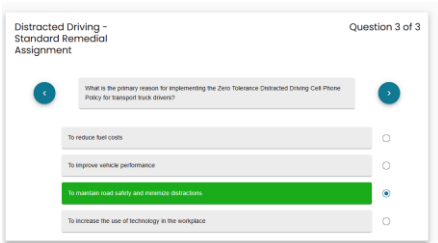

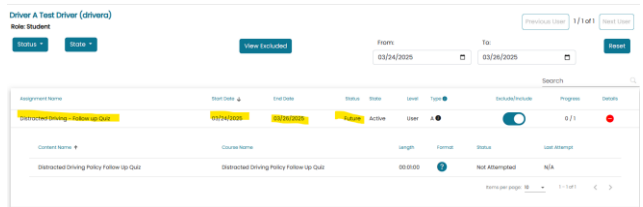

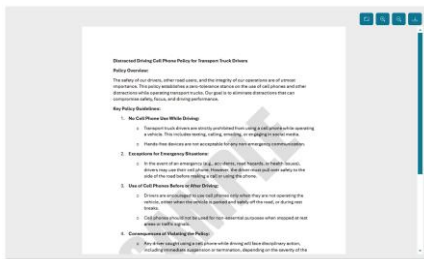

## Human Approach to Client Success

- *Assigned a Dedicated Client Service Rep.*
- *Ensures Your Success with the System*
- *Handles All System Administration Functions*
- *Answer All Tech Questions from Drivers*

# 4

## Meaningful and Organized Structure

- *Customized content creation and scheduling for emphasis of your unique company culture.*
- *Structured documentation and follow-up.*
- *Combine IWS content with your own.*

# Testimonials

*"We have a customer that requires special training. We posted the training on Infnit-I and were their only company that completed the training. We have a hard time getting all our employees together for training due to conflicting schedules. Infnit-i allows all of our employees to do their training at their pace. We really like that we can add our own curriculum and customize the training to our needs."*

**Chris Van Meerhaeghe**  
Fleet Operations Manager  
Robertson Williams Transport

*"We rely on our service rep. She's great. All I have to do is call her and say, 'This is what I want to do this quarter.' She takes care of it. It's easy. That's the thing with the service reps here. They are knowledgeable. They are friendly, and if you're not calling them, they're calling you, saying 'What can I do for you?' It's great."*

**Ricky Parker**  
Director of Safety  
KLLM Transport

*"We developed a new driver training program several years ago that included a multi facet approach to improve fleet safety. This program was designed around educating our drivers on several different levels. Our first opportunity for training is during orientation, once this is complete, we start a continuous education process during their tenure at RG Transport. In addition, when needed corrective action training is also available. The Infnit-I system enabled RG Transport to tailor fit a training program that worked on all fronts of our training needs."*

*Since we have implemented Infnit-I system, we have seen significant improvements in our accident ratios and loss runs."*

**Hue Andrews**  
Chief Operating Officer,  
RG Transport, Inc.
